

SUNSET HYSSOP

AGASTACHE RUPESTRIS

FAVORED BY HUMANS AND HUMMINGBIRDS ALIKE, SUNSET HYSSOP, OR LICORICE MINT, HAPPILY OPENS ITS ORANGE AND SMOKY PLUM BLOSSOMS STARTING IN THE MIDDLE OF THE WORST OF THE SUMMER HEAT. THE SMALL, TRUMPET SHAPED NECTAR-RICH BLOOMS ARE OBVIOUSLY AIMED AT HUMMINGBIRDS AS THE POLLINATOR OF CHOICE, AND THE BIRDS GLADLY OBLIGE. DROUGHT-TOLERANT, DEER RESISTANT AND LONG BLOOMING, IT IS A NATURAL CHOICE FOR LATE SUMMER COLOR AND ACCENTS THE BLUE BLOSSOM DOMINATED MEDITERRANEANS PERFECTLY. AND THE BEST PART? THE SILVER, FINE-TEXTURED FOLIAGE SMELLS DELICIOUSLY OF ROOT BEER! IN FACT, BOTH LEAVES AND FLOWERS ARE EDIBLE AND MAKE A GREAT ADDITION TO HERBAL TEAS, CONFECTIONS, SALADS, OR ANYWHERE YOU WOULD LIKE TO SAVOR THEIR UNIQUE HERBAL FLAVOR
