

GREEN GLOBE ARTICHOKE

CYNARA SCOLYMUS 'GREEN GLOBE'

THE CLASSIC ARTICHOKE, GREEN GLOBE FORMS TIGHT, ROUNDED CHOKES WITH PLENTY OF THAT ARTICHOKE FLAVOR THAT LOVERS OF THE THISTLE ARE SO FAMILIAR WITH. THE DEEPLY DISSECTED SILVERY FOLIAGE REACHES ABOUT 4' HIGH AND WIDE AND PAVES THE WAY FOR THE FLOWER BUDS (AKA: ARTICHOKE) WHICH APPEAR ON BLOOMING STALKS PERCHED ABOVE THE PREHISTORIC LOOKING LEAVES. BE SURE TO HARVEST THEM BEFORE THE BUDS OPEN! THOUGH THEY LOOK TOUGH, ARTICHOKE PREFER NOT TO HAVE TO DEAL WITH EXTREMES OF TEMPERATURE. A GOOD LAYER OF MULCH IS VERY HELPFUL TO KEEP THEM ON AN EVEN KEEL. PRODUCTION IS BEST IN FULL SUN, BUT THE PLANTS CAN BE KEPT HAPPIER IN HOT SUMMER CLIMATES BY PLANTING IN AREAS WITH A BIT OF AFTERNOON SHADE. SUPPLY FERTILE GARDEN SOIL AND REGULAR WATER FOR BEST PRODUCTION. YUM!
