

POPLAR-LEAF ROCK ROSE

CISTUS POPULIFOLIUS

WE ARE CONTINUALLY AMAZED BY THE DELICACY OF THE CREPE PAPER BLOSSOMS OF THE ROCK ROSES, CONSIDERING THE TOUGHNESS OF THE PLANTS. POPLAR-LEAF ROCK ROSE IS A LARGE GROWER, REACHING 6' HIGH AND WIDE. THE DARK GREEN, EVERGREEN FOLIAGE HAS DEEPLY WAVY MARGINS ADDING UNIQUE TEXTURE TO THE DENSE SHRUB. LARGE, SNOW WHITE BLOOMS CENTRALLY SPRINKLED WITH YELLOW STAMENS FOLLOW RED-HUED BUDS IN MAY, ATTRACTING POLLINATORS BOTH NEAR AND FAR. DROUGHT AND HEAT-TOLERANT, THIS ONE WILL SERVE WELL AS A SCREEN PLANTED IN THE DISTANCE, BUT DESERVES A SPOT WHERE THE LOVELY FLOWER BUDS, BEAUTIFUL BLOSSOMS, AND TEXTURAL QUALITIES CAN BE APPRECIATED CLOSE UP. ADD THIS ONE TO YOUR LIST OF LUSH LOOKING PLANTS THAT CAN TOLERATE A LOT OF NEGLECT. NICE!
