

VIVID HARDY ICE PLANT

DELOSPERMA POOLS

NEW ON THE HORTICULTURAL SCENE, THIS FULLY PERENNIAL, FROST-TOLERANT, ICE PLANT FORMS A TIGHT MAT OF SUCCULENT, APPLE GREEN FOLIAGE WHICH IS QUITE ATTRACTIVE IN ITS OWN RIGHT, BUT WAIT-TIL YOU SEE THE FLOWERS! ORANGE AND MAGENTA RAYS RADIATE OUT FROM A LAVENDER CENTER ON 1" BLOOMS THAT CAN COVER THE ENTIRE PLANT. APPEARING MOSTLY IN SPRING AND EARLY SUMMER, IT CONTINUES SHOOTING OUT NEON DAISIES ALL THE WAY INTO SEPTEMBER. TO 2" HIGH, THIS ONE MAKES A WEED SMOTHERING MAT OF FOLIAGE THAT IS DROUGHT-TOLERANT AND SPREADING, ROOTING WHEREVER IT TOUCHES THE SOIL ALONG ITS JOURNEY.

SUN TO LIGHT SHADE

ZONES 4-9
