

BOWLES' MAUVE WALLFLOWER

ERYSIMUM 'BOWLES' MAUVE

ONE OF THE FIRST PERENNIALS TO START BLOOMING IN SPRING, BOWLES' MAUVE CONTINUES PUTTING OUT ITS LILAC BLOSSOMS THROUGH MUCH OF THE SUMMER AND OFTEN BEYOND. EVEN OUT OF BLOOM, ITS RUGGED LOOKING EVERGREEN FOLIAGE ADDS INTERESTING TEXTURE TO THE GARDEN. CUT IT BACK REGULARLY TO KEEP IT TIDY, OR LET IT SPRAWL TO ITS FULL 2' TALL AND WIDE FORM. EITHER WAY, A LIGHT HAIRCUT IN MIDSUMMER WILL BRING ON MORE OF THE POLLINATOR ATTRACTING BLOSSOMS. NOT VERY LONG LIVED, BUT VERY SATISFYING FOR ITS LONG BLOOM TIME, DEER RESISTANCE, AND DROUGHT TOLERANCE. REMOVE SPENT BLOSSOMS REGULARLY TO KEEP NEW ONES COMING.

SUN TO PART SHADE

ZONES 6-11
