

# MEDITERRANEAN SPURGE

## EUPHORBIA CHARACIAS

ADD ARCHITECTURE TO YOUR GARDEN! MEDITERRANEAN SPURGE IS A 2-3" TALL TEXTURAL PLANT OF POINTED BLUE GREEN LEAVES, WHICH ARE TOPPED BY SPACE AGE, CYLINDRICAL YELLOW-GREEN BLOSSOMS IN SPRINGTIME. DROUGHT-TOLERANT WITH THE BEST, IT NEEDS LITTLE IN TERMS OF ATTENTION FROM YOU ONCE ESTABLISHED. VERY DEER RESISTANT, AND EVEN GOPHER RESISTANT, THIS ONE WILL GIVE YOU LITTLE TROUBLE. PLANT IT NEAR YOUR MORE TARGETED PLANTS TO HELP KEEP THE PLANT EATERS AT BAY! IT DOES TEND TO SEED ITSELF, SO CHOOSE YOUR PLANTING SITE WHERE THAT IS APPROPRIATE, OR BE READY TO MOVE VOLUNTEERS. REMOVE STEMS THAT HAVE BLOSSOMED TO THE BASE OF THE PLANT. IT WILL BE FOLLOWED BY MANY OTHERS. SUCH A WONDERFUL, EXOTIC LOOKING PLANT AND SO EASY.
