

# ADAGIO MAIDEN GRASS

MISCANTHUS SINENSIS 'ADAGIO'

ADAGIO IS A DWARF AMONG GIANTS; ALTHOUGH THE MAIDEN GRASSES CAN REACH SUBSTANTIAL SIZE, TO SAY THE LEAST, ADAGIO STAYS A COMPACT HUMMOCK OF FRESH GRASSY BLADES THAT REACHES ONLY ABOUT 3 X 4'. WHEN THE FEATHERY SEED HEADS APPEAR, THE ENTIRE PLANT GROWS TO ABOUT 5'. STUNNING WHEN BACKLIT, IT IS LOVELY PLANTED NEXT TO OTHER FALL BLOOMERS LIKE RUDBECKIA, AUTUMN SAGE, AND GOLDENROD. DROUGHT TOLERANT AND COMPLETELY DEER RESISTANT. DORMANT IN WINTER, BUT STAYS ATTRACTIVE FOR MONTHS. CUT BACK TO 1' HIGH ANYTIME BETWEEN DORMANCY AND BEFORE GROWTH BEGINS IN SPRING

ZONES 6-9

SUN TO LIGHT SHADE
