

GAY PENSTEMON

PENSTEMON LAETUS

ANOTHER OF OUR STUNNING CALIFORNIA NATIVE PENSTEMONS, GAY PENSTEMON'S BRILLIANT BLUE TO PURPLE BLOSSOMS STAND UP TO 2' TALL IN EARLY SUMMER. THE EVENTUAL HEIGHT OF THE PLANT VARIES ACCORDING TO THE ELEVATION AT WHICH IT IS GROWN, THE HIGHER THE ELEVATION, THE HIGHER THE PLANT! BUT NO MATTER THE SIZE IT GROWS UP TO BE, IT IS A LOVELY SIGHT TO BEHOLD WHEN ITS VIVID BLOSSOMS OPEN TO THE DELIGHT OF PEOPLE AND POLLINATORS EVERYWHERE. TOLERATES DROUGHT, BUT GROWS WELL WITH SUMMER WATER, AS LONG AS YOU CAN PROVIDE GOOD DRAINAGE. EVERGREEN, LONG LIVED, AND LIKE ALL PENSTEMONS, ATTRACTIVE TO HUMMINGBIRDS.
