

MOUNTAIN PRIDE

PENSTEMON NEWBERRYI

THIS ALPINE PERENNIAL NATIVE TO THE SIERRA NEVADA FORMS AN EVERGREEN SHRUBLET REACHING A SCANT 6-8" IN HEIGHT. GROWING IN SOME OF THE MOST ADVERSE CONDITIONS, IT IS MOST OFTEN SEEN EMERGING FROM THE CRACKS BETWEEN BOULDERS OR GROWING IN GRAVEL SCREE WHERE IT'S HOT PINK BLOOMS PROVIDE A CONTRAST NOT EASILY FORGOTTEN. RIGHT AT HOME IN TROUGHS OR TRUE ROCK GARDENS, ITS PRESENCE EVOKES A DAY IN THE MOUNTAINS, WHERE THE BIGGEST, BRIGHTEST, AND BOLDEST COME TO PLAY ON THEIR ROUGH AND TUMBLE PLAYGROUND. GIVE EXCELLENT DRAINAGE, MORE ROCK THAN SOIL, DON'T OVERWATER, AND ENJOY.

ZONES 4-9

SUN TO PART SHADE
