

# ROCKY MOUNTAIN PENSTEMON

## PENSTEMON STRICTUS

WITH ITS UPRIGHT FORM AND MATURE SIZE OF 2-3 FEET TALL AND WIDE, THIS WESTERN NATIVE PENSTEMON CAN TAKE THE PLACE OF A SMALL SHRUB IN THE LANDSCAPE. LIKE MOST PENSTEMONS, IT HAS EVERGREEN FOLIAGE AND IS ATTRACTIVE TO BEES AND HUMMINGBIRDS, AS WELL AS NUMEROUS BENEFICIAL INSECTS. ITS 30" SPIRES OF TRUMPET-SHAPED BLOSSOMS APPEAR IN EARLY SUMMER THOUGH QUITE DROUGHT-TOLERANT, THIS ONE WILL ALSO ACCEPT SUMMER WATER, MAKING IT ONE OF THE EASIEST PENSTEMONS TO CULTIVATE. LONG LIVED AND STUNNINGLY BEAUTIFUL.

USDA ZONES 4-9
