

SIERRA DE SAN ANTONIO SAGE

SALVIA X JAMENSIS SIERRA DE SAN ANTONIO

THE LUSCIOUS BI-COLORED BLOOMS OF THIS AUTUMN AND LITTLE LEAF SAGE HYBRID ARE A STANDOUT. KNOWN FOR THEIR DURABILITY, THESE HYBRIDS TOLERATE HEAT, DROUGHT, AND COLD AND COME BACK BIGGER AND FULLER EACH YEAR. ATTRACTIVE TO HUMMINGBIRDS AND OTHER POLLINATORS, THIS ADDITION TO YOUR GARDEN BRINGS ANIMATION AS WELL AS TIMELESS BEAUTY. THE AROMATIC FOLIAGE RESISTS BROWSING BY DEER WHILE THE BLOOMS KEEP COMING LATE SPRING TO FALL, MAKING THIS ONE OF THE BEST FLOWERING PLANTS FOR GARDENS WHERE THE DEER HAVE ACCESS. TO 2' TALL AND WIDE.

SUN TO LIGHT SHADE
