

# TRANSYLVANIAN SAGE

## SALVIA TRANSYLVANICA

THIS TRUE BLUE BLOOMING SAGE FROM ROMANIA BEARS A SUPERFICIAL SIMILARITY TO THE MORE COMMON SALVIA X SUPERBA AND NEMOROSA CULTIVARS, BUT GROWS BIGGER AND BOLDER IN YOUR GARDEN. REACHING UP TO 3 FEET TALL, THE BRANCHED FLOWER SPIKES ELEVATE THEMSELVES AS A BEACON TO BEES AND HUMMINGBIRDS. COARSE IN TEXTURE WITH 3" ARROWHEAD SHAPED LEAVES, IT OFFERS A NICE CONTRAST TO THE FINER BLADED PLANTS. DROUGHT-TOLERANT ONCE ESTABLISHED IT ALSO TOLERATES REGULAR WATER AND MAKES A NICE CONTAINER SPECIMEN FOR A LARGE POT. PLANT THIS LONG BLOOMER IN SUN FOR BEST FORM AND FLOWERING.

ZONES 4-8

SUN TO LIGHT SHADE
