

# HENS AND CHICKS

## SEMPERIVNUM TECTORUM 'RUBRUM'

TEXTURALLY INTRIGUING, HENS AND CHICKS ARE A CLASSIC GARDEN PLANT WITH TRUE ARTISTIC APPEAL. KNOWN FOR THEIR ABILITY TO GROW IN IMPOSSIBLE PLACES WITH VERY LITTLE SOIL AND THEIR PROPENSITY TO SEND OUT TINY VINIPAROUS CHICKS, HENS AND CHICKS ARE A BEAUTIFUL ADDITION TO ROCK GARDENS, SUCCULENT DISHES, AND (ESPECIALLY!) CRACKS IN ROCK WALLS. NEEDING VERY LITTLE IF ANY WATER ONCE ESTABLISHED, DEPENDING ON EXPOSURE, HENS AND CHICKS ARE QUITE COLD TOLERANT, AND WILL NOT FREEZE OUT DESPITE THEIR SUCCULENT LEAVES, WHICH

TAKE ON PRONOUNCED RED TONES IN COOL WEATHER. WITH THEIR ABILITY TO ROOT WHEREVER THEY TOUCH SOIL, ALL THEY REALLY ASK IS FOR GOOD DRAINAGE. EASY.
