

SILVER GERMANDER

TEUCRUM ACKERMANNII

A NICE ROCK GARDEN PLANT OR GROUND COVER, SILVER GERMANDER IS A DIFFERENT TAKE ON THE MORE FAMILIAR CREEPING GERMANDER WITH FOLIAGE THAT IS WHITE GRAY AND WHITE STEMS, IT HAS SMALL PURPLE PINK BLOOMS THAT MAKE THE WHOLE PLANT APPEAR FUZZY SOMEHOW. SOFT IN OUTLINE, IT CREEPS ALONG AT 3-6" HIGH BY 18" ACROSS. SPILLING NICELY, IT IS SUITABLE FOR A CONTAINER OR CREEPING AMONG BOULDERS. ALPINE TROUGH, ANYONE? WITH A NICE, HERBAL FRAGRANCE, IT IS QUITE DEER RESISTANT. IT REQUIRES LITTLE IN THE WAY OF WATER ONCE ESTABLISHED AND GROWS WELL IN POOR SOILS. THE BLOSSOMS, WHICH ARE HEAVIEST IN SPRING, BUT APPEAR SPORADICALLY THROUGH THE SUMMER AND FALL, ARE ATTRACTIVE TO BEES AND OTHER POLLINATORS
