

# CREEPING GERMANDER

TEUCRIUM COSSONII  
MAJORICUM

THIS LOW GROWING GERMANDER FORMS A 4-6" TALL MAT OF EVERGRAY LEAVES, TRAILING TO 3 FEET WIDE. THE FRAGRANT ROSY PURPLE FLOWERS APPEAR OVER A VERY LONG PERIOD STARTING IN LATE SPRING. DROUGHT-TOLERANT AND DEER RESISTANT, THIS SUN LOVER MAKES A GREAT SMALL SCALE GROUND COVER AND IS LOVELY TRAILING OUT OF PLANTED CONTAINERS, WHERE IT WOULD COMBINE WELL WITH OTHER

MEDITERRANEAN PLANTS, SUCH AS LAVENDER, SAGE, AND LAMB'S EARS. THIS IS A TOUGH BEAUTY, A REAL PERIOD (AMAZINGLY!) AS LONG AS AN ANNUAL BEDDING PLANT.
