PURPLETOP VERVAIN VERBENA BONARIENSIS

THE BUTTERFLIES THAT LOVE THE LAVENDER BLOSSOMS OF THIS PLANT DON'T CARE HOW DROUGHT-TOLERANT IT IS. NOR DO THEY CARE ABOUT THE DRAMATIC VISUAL IMPACT OF ITS 4-6' TALL, AIRY STALKS STUDDED WITH PUFFBALLS OF VERBENA FLOWERS. THEY MAY, IN THEIR OWN WAY, HOWEVER, CARE ABOUT ITS RESEEDING HABIT (MORE NECTAR TO SIP!) AND ITS LONG BLOOM TIME LASTING FROM SUMMER AND INTO FALL. PLANT THIS RUGGED PLANT WHERE IT HAS ROOM TO SPREAD OUT AND MULTIPLY, AMONG TALL ORNAMENTAL GRASSES IS LOVELY, AND ENJOY THE PURPLE HAZE THE FLOWERS CREATE EN MASS. WINNER OF THE ROYAL HORTICULTURAL SOCIETY'S AWARD OF GARDEN MERIT.

USDA ZONES 7-10
